# GOLD CHIEF OPENS

body increasing in size and values with depth. On the 100-foot level, where it is about twelve feet wide and has been opened seventy feet on its strike, the average values are \$11.50 a ton. On the 200-foot level a crosscut shows four-teen feet of ore of the same value as that with the control of the same value as that with the control of the same value as that with the control of the same value as that with the control of the same value as that with the control of the same value as that with the control of the same value as that we have the control of the same value as the control of the contr that on the 100 level. The entire in-clined shaft sampled from the surface to the 200 level gives values of \$12 a

William Lloyd, manager of the company, has been contending that if the crosscut at 250 feet revealed conditions as good as those above, he would say that a big mine was assured. With the marked improvement demonstrated he s naturally enthusiastic over the show-

The ore is said to resemble in many respects that of the Consolidated Mercur mine at Mercur. The company is installing a cyanide plant to treat it, and Mr. Rand is studying the Mercur and Boston Sunshine mills with the idea of chapting some of their features to the treatment of the Chief ore. He is already convinced that the Moore filter process, which is being Moore filter process, which is being used successfully in the Sunshine mill, should be installed in the new plant.

Buys De Lamar Plant.

The Gold Chief company has been fortunate in being able to purchase at a reasonable price much of the equipment and machinery used in the Bamment and machinery used in the Bamberger-De Lamar cyanide plant, at De Lamar, which, on account of copper coming into the cres at depth, had to be abandoned. Fifteen 50-ton cyanide tanks, ceveral 100-ton tanks and much machinery which is 15 good as new, is being transferred from De Lamar to the Chief camp.

the Chief camp.
While he was in the southern country Mr. Rand took occasion to examine several of the mines of Pioche, and he became convinced that the camp will be heard from as a producer in a large way as soon as the railroad shall be placed in commission. The Prince is one of the great mines of the country, he says; the Mendha is developing ore everywhere, and the Centennial Ploche in its new shaft is nearly due to catch the extension of the Prince's main ore

# BY GOLDFIELD CON.

That is Estimated Value of Big Company's Output During March.

Production of the Goldfield Consolidated Mines company for March, according to preliminary estimates of General Manager J. R. Finley, amounted to 26,617 tons of a gross value of \$1,015,000. The gold recovered was approximately \$950,000, with expenses of \$220,600, leaving a net profit of \$730,—West. Nev. Verylea C.

Some Possibilities Remain.

'Tt has been told that on the 750foot level of the Clearmont is an ore
body 25 feet wide which will average
\$500 a ton. When it is known that
many mine carloads will return from
100 to 140 cunces of gold to the ton,
it will be realized that some possibilties remain for the Consolidated. While
the management declines to tell of the
spectacular values that have been developed at various times, permitting
the monthly statements and quarterly
dividends to speak for themselves, the
public must wonder what kind of treasure vault has been opened that proouces \$1,900,000 a month without
straining the resources that are in
sight. But the figures of the management and the dividends that are distributed are sufficient proof of the
magnitude of the mines."

TODAY

2nd-Hand **Typewriters** 

Real Bargains for the prices asked—and every machine has been overhauled and placed in good working order. These machines are big money savers, and will serve any ordinary purpose a long time. Of course, if you buy a new typewriter, you should buy the Underwood. We sell it.

Buy Them Today

## IRON BLOSSOM IS GREAT ORE BODY ON UPWARD TREND

which exhibits signs of setting in for a steady advance. There was new buying of it yesterday at \$1.47½ to \$1.52½, and relatively little buying is required to cause it to respond. Sioux Consolidated was strong at 44½ to 45½c, Lower Mammoth held at 52c, Carisa was firm at 80c, Cedar Talisman was slightly stronger at 5½c to 6½c and Tintic Central was active at 11c to 10½c.

### REPORTS GOOD ORE IN ESCALON GROUP

o 10½c.
The buying, while not of the whirlwind tended in that direction. Mr. Erwin the day's sales:

Total number of shares sold, 59,475; value, \$15,988.37. Closing quotations and the day's sales:

tended in that direction. All, Erwing considers himself fortunate in having been able to locate one claim and a fractional claim just south of the Bunker Hill group. In one of the ledges traced from Bunker Hill group he having considers himself fortunate in having the day's sales: opened a good showing of ore with values of about \$12 a ton. Mr. Erwin was the original locator of the Stray Dog group of claims in Manhattan, and he has named his Jarbidge group the

> Bourne Showing Improves. The showing in the Bourne tunnel has improved rapidly, he says. Twelve feet of ledge matter is exposed and the values are higher and more regular. The showing in the Belmont is likewise much better.
>
> Five sets of leasers started work on Education of the Polymer of

Five sets of leasers started work on the Bourne property April 2. Each has 300 feet of ground on the ledge, making a full claim length upon which active work is now being done, aside from the company workings. There appears to be no abatement of the rush to the camp. Many are going in now by way of Deeth, Nev. The wagon road on the Twin Falls route is in condition that teams go as far as Jack Hole. that teams go as far as Jack Hole, only three miles from Jarbidge, and it is promised that the road into the camp will be passable within a few

#### REFUSE LARGE SUM FOR WILSON MESA CLAIMS

Excitement over the Wilson Mesa placer ground in Grand county, which has developed into a giant quartz milling prospect, has become sufficiently acute that one deal has fallen through for the reason that the owners "raised" the price. A tacit agreement had been reached, it appears, that the Wilder brothers were to accept from Nevada and California interests which have invaded the camp the sum of \$75,000 for their placer holdings, but when the intending purchasers offered to pay over the money it was refused. J. H. Webb and Emil Boren have virtually closed a deal disposing of a one-J. M. West and Emil Boren have virtually closed a deal disposing of a one-half interest in their mesa property. It is on their property that a stamp mill is to be installed at once.

CUT ORE CHAMBER

Attains Good Results in Driving Tunnel.

chambers will be encountered on the vein, so that the prospect for opening a big mine is exceptionally good.

There continues to be considerable activity in the district, Mr. Whipple says. Leasers on the Salt Lake Copper company's Copper Mountain property are shipping high-grade ore as usual. The Tecoma Mines company has taken out a large shipment of sand carbo-nate ore. The Utah Lead company is sinking a shaft with the intention of

going to the 500 level, and the Tecoma Consolidated company, which is com-posed largely of Provo people, is soon to start work. BOSTON AND NEW YORK COPPER SHARE MARKETS

New York Listed Stocks.

Mineral Mountain Company Would Have Made Profit But for Development Yet Ineffective.

Day sunk its shaft to the 1,000-foot level and there ran onto what appeared to be the top of a large body of pay ore. The shaft was then continued to the 1,000-foot level, where the vein was opened without finding pay values.

Superintendent C. C. Griggs, in his report presented at the annual meeting of the stockholders yesterday, expressed the firm conviction that the best ore bodies would yet be found in May Day's lower levels. As a matter of expediency, however, he advised that prospecting for the present be confined to the 500-foot level, where there is expressed with relatively little work.

The mine is in position to continue the shipping ore and operating the mili at about the rate malintained during the inst year, which means that profit will be realized with the force at this time employed.

The annual meeting was well attended, the total of 556,025 shares, out of a possible total of 800,000 shares, having been represented. The old board of directors was re-elected, its members being John Dern, W. S. Methods, the total of 556,025 shares, out of a possible total of 800,000 shares, having been represented. IF. J. HAGENBARTH NOW

At a meeting of directors of the Yer-ington Consolidated Copper company, held in this city yesterday, F. J. Ha-genbarth was elected president of the company. Mr. Hagenbarth is out of the city at this time, and the plans of the company are not being discussed by the other directors, but it is believed by some that his election to the IN THE DISTRICT COURT, PROpresidency means that something out bate division, in and for Salt Lake counof the ordinary is pending. Mr. Ha-genbarth is one of the large stock-

ROSEBERRY LESSES
AT WORK IN GOOD ORE

Malloy and Hampton are opening a good body of ore on the Roseberry estate. In the new Rex lease, says the flawhide Press-Times. They have a couple of feet of a good grade of ore in which there is a rich streak. The whole thing will make a high-grade whole thing groposition, though they are sacking the high-grade separately.

Arrangements are now under way for the installation of a holsting plant, which they expect to have in operation shortly after the first of the month.

Schmidt & Loufek, who recently made a rich strike on the Roseberry, are soping from a three-foot breast of ore which gives average values of ore which gives average values of good infilling ore ready to be treated in one of the local mills.

JARBIDGE APPEALS TO OLD-TIME OPERATOR

G. N Fay, an old-time mine operator of Cripple Creek and Goldfield, arrived in this city yesterday from Jarbidge, where he succeeded in acquiring an inside property. While no one can safely predict the future of the camp, he says, until all of the snow disappears and more work shall have been done, he found such portions of the district as have been relieved of snow to be thoroughly mineralized, with good ore snowings in the properties in which enough work has been done to disclose ore. He regards the chances better than ever for a number of large mines to be opened.

Crosscut of 16 Feet on Lowest
Level is Entirely in
\$16 Ore.

Assurance of a big mine in the property of the Gold Chief Mining company, near Panaca, Nev., is contained in the news brought from camp yesterday by H. W. Rand of Portland, Ore, one of the large interests in the company, that on the 250-foot level a crosscut, has disclosed sketeen feet of ore seven than 30 for the state of the second core body increasing in evidence.

Development of the mine has afforded an unusual example of an ore body increasing in size and values with depth. On the 100-foot level, where it is about twelve feet wide and has been bout well-off the property of the 100-foot level, where it is about twelve feet wide and has been bout well-off the property of the 100-foot level, where it is about twelve feet wide and has been bout well-off the property of the 100-foot level, where it is about twelve feet wide and has been bout well-off the property of the 100-foot level with restallable to the surface show in the first break which make into ore body increasing in size and values with depth. On the 100-foot level, where it is about twelve feet wide and has been bout well-off the property of the first break which make into ore body increasing in size and values with depth. On the 100-foot level, where it is about twelve feet wide and has been bout well-off the property of the first break which make into ore body increasing in size and values with depth. On the 100-foot level, where it is about twelve feet wide and has been bout well-off the property of the make the property of the first break which make it as high a contained in the court and the first break which make the open and district, is additionally to the first break will be an accordance of the part has a contained in the court and the first break will be an account of the same multing to \$55,25,25. Goldfield Mining company for the year. 1909, which is being sent to stock-holders with checks for the dividend that was declared a month ago, shows that 34,524,619 tons of ore of an average value of \$18.42 were milled, and 173.86 tons of an average value of \$257.54 were shipped to smelter, making a total production of \$641,030.11. The cost of marketing, including freight, express, smelting, etc., was \$107,312.92, leaving net ore returns of \$531,217.19. Two dividends of \$105,000.

each were paid during the year, one on June 5 and another on October 25. The cash balance on January 1, 1507, was \$625.082.54. and on January 1, 1516, \$665,132.56.

The report shows a steady improvement in mill performance, scarting in January with a recovery of 63.13 per cent, and in December showing 95.05 per cent recovery.
